

# Coral Minerals

*Legendary Minerals From The Deep Sea*

## **The 115 Year-Old Man**

In 1979, a British journalist went to Japan to interview one of the oldest documented living people in the world, Mr. Izumi. He was a sprightly 115 year-old man in amazingly good health who lived on an island off the coast of Japan. He appeared healthy, active and alert. Most of the other inhabitants on the island were also in great health and seldom died before age 95!

## **What Was Their Secret Of Youth?**

Researchers found the water the islanders drank was uniquely different. It contained ionized minerals leached from coral on which the island was built. These unique minerals made the water highly alkaline. When drunk, it helped the body keep a superior acid/alkaline balance. The highly mineralized "coral" water was found to be chemically very similar to essential elements found in the human skeleton, body fluids, blood and amniotic fluid. Incredibly, the researchers also discovered that the "coral" water could neutralize internal waste products, harmful bacterial toxins and heavy metals.

## **The Calcium Factor**

The body must reduce every form of calcium into its ionized form in order to absorb it. Since coral minerals contain calcium that is already ionized, the body can use the calcium immediately without having to break it down. This is great news for the elderly and those with poor digestion. A key role of ionized calcium is to neutralize harmful acidic compounds anywhere in the body, before damage takes place. Ionized calcium is critical to cleansing. Even a great herbal detox won't work very well without ionized calcium.

## **The Key To Great Health**

If the body's pH becomes acidic, it becomes harder and harder for the body to uptake other nutrients, such as

minerals, vitamins or herbs. The key is to re-establish the proper acid/alkaline balance of your body. An acidic pH creates a hostile internal environment, like a raging storm, making the body struggle to get the nutrients it needs. The more acid you become, the worse you will feel. As the body's pH comes into better balance (pH 6.4 to 7.0), it is like a sunny spring day; your body can easily assimilate minerals that were very difficult to absorb at a more acid pH. To measure your own urine pH, use graduated pH tape.

## **The GateWay Factor**

We call coral minerals the "Gateway Factor" because as it begins to correct the deep-seated acid/alkaline imbalance in the body, it can potentiate (like a "gateway") the uptake of other nutrients (in food or supplements). Once the acid/alkaline balance moves back into a more optimal range, nutrients are more accessible and uptake is greater.

## **10 To 20 Times More Oxygen**

Every cancer researcher knows that cancer cannot survive in an alkaline environment. If a cancer tumor is put in a beaker with an alkaline media, the cancer will die in 3 hours. In the alkali, you have oxygen. As the pH of the urine/saliva drops, less and less oxygen is available to the tissues. Small changes of .1 to .2 in pH can mean 10 to 20 times more oxygen availability. Ionized calcium is the key mineral to keep the pH near ideal.

## **An Amazing Cancer Story**

In the 1950's, one doctor noticed that all of his cancer patients were severely deficient in calcium. He found that as he treated them for their calcium deficiency, their bodies gradually got strong enough to kill the cancer. Even terminal cancer patients were able to survive. His theory

was that soluble (ionized) calcium is the main mineral form that can rapidly alkalinize the body. The body can then produce mono-ortho-calcium phosphate which then raises the pH back into the proper, alkaline range. As soon as the tissue acidity is reduced, the cancer cannot survive.

We found that the coral minerals have spectacular tissue

## Real Life Stories with Coral Minerals

### ● Athletic Super Boost

All athletes want to enhance their training so they can delay the muscle burn from lactic acid buildup. When the muscle burn comes on, the energy decays fast and their ability to perform drops. One Triathlon coach gives the coral minerals to his trainees. He says that it delays muscle burn and when it does come on, it is less intense. It improves performance and endurance. He feels that this is a revolutionary product for athletes internationally.

### ● Degenerating Discs

A middle-aged woman had degenerating discs in her neck for over 10 years. She had excruciating pain every day for which she had to take large doses of Motrin 3 or 4 times per day. In the afternoon, she had to lie down for a few hours. In 3 weeks on the coral minerals, she was able to discontinue her pain medication. She feels she has a new life.

### ● Painful Feet

A man in his mid 70's had adult onset diabetes. His toes became numb, his feet hurt and had sores that would not go away. He had no feeling in his left foot for over a year. After taking the coral minerals, his right foot began to itch and become warm, then the left foot began to do the same. Gradually, his feet became warm so he did not have to sleep in heavy socks. After 3 months on the coral minerals, his blood sugar levels became normal. He found he no longer needed insulin injections.

### ● Difficulty Walking

One woman had arthritis for over 20 years. It became difficult for her to walk. The pain got worse and worse until she could not work. After only 2 weeks on the coral minerals, she felt less pain. Later, she could start shopping again and go places. She praised the coral minerals that gave her a sense of well being again.

### ● Low Back Pain

A very large body-builder was experiencing fatigue and low back pain. After taking his first dose of coral minerals, he felt the pain diminish. After a second dose a few minutes later, his back pain completely disappeared, much to his amazement.

### ● Feeling Cold

One middle-aged lady with poor metabolism said she always had a tendency to feel cold. She was amazed after her first drink of coral minerals, when a few minutes later, she felt her body

bioavailability when mixed with a charged organic aloe vera concentrate. Charged organic aloe vera has been strongly fortified with negative ions which give it an ultra high energy potential when mixed with the coral minerals. Most people can feel an energy burst within a few minutes of drinking this dynamic duo.

turn pleasantly warm. She sat by an open window all day, enjoying the cool breeze for the first time in years. A few days later, still taking the coral minerals, she said she could feel her head and gums heat up for several hours, helping to clear a long-standing dental infection.

### ● Osteoporotic Legs

One lady with osteoporosis for 12 years, had pain in her legs and could hardly walk. After 4 weeks on the coral minerals, she became pain-free. One day she spontaneously walked up the stairs, then realized that she was pain-free. She no longer takes medication. The grinding and popping sounds in her knees are gone.

### ● High Blood Pressure

One older lady took medication for her high blood pressure. She wanted to get off the medication because of its harmful side effects. After taking the coral minerals, her blood pressure slowly lowered until it is now normal without medication. She is thrilled.

### ● Painful Knees

An avid tennis player could no longer play tennis because of excruciating pain in his knee due to osteoarthritis. After taking the coral minerals for several months, he can now golf and play tennis again.

### ● Stiff Back

One man in his 50's had a stiff low back, related to impaired kidney function. After taking coral minerals for a few days, he experienced great relief of his back stiffness. Then he had a dramatic detoxification, with chills and fever, lasting one day, after which his low back stiffness was significantly relieved. The right kidney which had been acting up, also became stronger in function.

### ● Fibromyalgia

One female had fibromyalgia for over 5 years, with severe pain in her neck all the way to her low back. After taking the coral minerals for almost a week, she was amazed to find the pain was completely relieved. She no longer needs injections or pain-killers.
